Candeias, BA, Brazil — November 2026

Cover letter: Full Stack Developer / Systems Development Analyst

Dear Hiring Team,

I am **Anderson Ventura**, a software developer with more than 5 years in technology, and I am writing to introduce myself for **Full Stack Developer** or **Systems Development Analyst** opportunities.

At **Keep Informática**, I grew from technical support to development, earning **3 promotions**. Today I work end to end on **e-Contrib**, a tax management system used by Brazilian city governments: I gather requirements with clients as Product Owner, develop in **Python, Node.js and SQL**, build and test REST APIs, work with Docker and create Power BI dashboards.

In parallel, I founded **DevTI's**, where I build systems, websites and automation for other businesses, including **AgendaAI**, an online and WhatsApp scheduling platform with an intelligent assistant. This gave me direct contact with end clients: defining scope, meeting deadlines, delivering and providing support.

I use **AI in my daily development work**, with coding assistants and agents and prompt engineering, always with technical review of the output. I was also a mentor to **6 teams** in an educational project, which strengthened my ability to explain technical topics clearly.

What I can bring to your team:

- Ownership from requirements to deployment, focused on systems that work in production.
- Process automation and systems integration: REST APIs, data extraction and SQL routines.
- Business mindset and clear communication with clients, users and the team.

Available to **start immediately**, as a **full-time employee or contractor**, remote or hybrid. Projects in production and case studies at **venturacerqueira.github.io/en**. To book a 30-minute call: **cal.com/anderson-ventura-skfgbi/30min**.

Thank you for your time and consideration.
Sincerely,

Anderson Ventura Cerqueira
Mid-Level Software Developer · Founder of DevTI's
