PROFESSIONAL SUMMARY

Systems Analyst with 5+ years in technology and 3 promotions at Keep Informática. I work end to end on municipal tax management systems used by Brazilian city governments: requirements gathering as Product Owner, backend development in Python, Node.js and SQL, REST APIs, Docker and Power BI dashboards. Founder of DevTI's (sole proprietorship), where I build systems, websites and automation for other businesses, including the AgendaAI product. I use AI in my development workflow (coding assistants and agents, prompt engineering), always with technical review of the output. Tech mentor for 6 teams in an educational project.

TECHNICAL SKILLS

Backend: Python, Node.js, TypeScript, PHP

APIs and integrations: REST APIs, Postman, Swagger, web scraping

Data and BI: Power BI, pandas, dashboards

Methods: Scrum, Jira, Product Owner, technical documentation

Databases: MySQL, SQL Server, Firebird, data modeling

DevOps and automation: Docker, Git, GitHub, automation scripts

AI: Claude Code, ChatGPT, prompt engineering, multi-agent workflows

Front-end and UI: HTML, CSS, JavaScript, interface design

PROFESSIONAL EXPERIENCE

Founder and Developer — Current

Present

DevTI's (MEI) · my own company, in parallel

- Development of custom systems, websites and automation for other businesses.
- Direct client relationship: requirements, proposal, development, delivery and support.
- Own product AgendaAI: online and WhatsApp scheduling with an intelligent assistant.

Systems Analyst — Promotion — Current

11/2023 - Present

Keep Informática LTDA · Salvador, BA

- Product Owner role, leading requirements gathering and analysis with clients.
- Development and optimization of Python and SQL scripts for process automation and performance.
- Maintenance, refactoring and bug fixing, ensuring system stability and scalability.
- Strategic Power BI dashboards and reports to support decision-making.
- Implementation and testing of REST APIs; use of Docker in containerized environments.
- Systems in production: e-Contrib (tax management, electronic service invoices, tax debt, SIAFIC integration), taxpayer portals and maintenance of Compras Online (PHP/Yii2).

Tech Mentor (Educational Project)

2025

Luiz Viana Filho School · Candeias, BA

- Mentored 6 teams building websites, systems and digital solutions, including Arduino projects.
- Taught programming logic and development best practices.

Support Analyst — Promotion

11/2022 - 08/2023

Keep Informática

- Diagnosis and resolution of incidents in corporate systems.
- Functional and performance testing; source code maintenance and adjustments.
- Technical documentation and user training on information security.

Technical Support 09/2020 – 10/2022

Keep Informática

- Support for internal and external clients with a focus on high system availability.
- Failure analysis and testing to identify performance bottlenecks; process documentation.

Technical Support Intern 02/2019 – 06/2019

Chevrolet Retirauto Salvador

- Help desk and service desk, data backup and restore, network monitoring.

FEATURED PROJECTS

AgendaAI · agendaaiweb.com.br
Online and WhatsApp scheduling SaaS for salons, clinics and independent professionals, with an intelligent assistant.

NFS-e and Taxpayer Portal · e-contrib.com.br/nfs-e
NFS-e login page design and a city portal for payment slips, certificates and document validation.

eSocial Scraping · GitHub
Automated Python extraction with progress resume, fault tolerance and CSV export.

e-Contrib · e-contrib.com.br
Municipal tax management: taxes, national electronic service invoices (NFS-e), tax debt and SIAFIC integration.

IBGE CNAE API · GitHub
TypeScript/Node.js API that consumes and formats Brazil's CNAE economic activity data, with Swagger docs.

MySQL schema → Markdown generator · GitHub
Extracts table and column metadata and generates database documentation in Markdown.

EDUCATION

Bachelor's degree in Software Engineering
UCSAL, Catholic University of Salvador · expected 07/2029

Postgraduate degree in BI, Big Data and Analytics
UNOPAR, Northern Paraná University · completed

Associate degree in Systems Analysis and Development
Faculdade São Salvador · completed

COURSES

Agile Projects with Scrum
PHP and Laravel (Udemy)
Algorithms and Data Structures
Introduction to Git and GitHub
Data Modeling
Networking Fundamentals (Cisco / SENAI)
